## PROFESSIONAL SUMMARY

Java Backend Developer with 6 months of professional experience in fintech, specializing in Java, Spring Boot and REST API development. Experienced in developing and maintaining payment-related backend services, integrating payment gateways (PayU, PhonePe and Cashfree), and working with Spring Data JPA, PostgreSQL and Redis. Hands-on experience integrating React.js frontends with backend services. Basic Python knowledge from a machine learning internship and projects using FastAPI, LangChain and RAG. Completed Java Full Stack Development certification from ExcelR.

## TECHNICAL SKILLS

- **Backend:** Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, JWT, REST APIs
- **Python (Basic):** Python, FastAPI, Streamlit, Pandas, NumPy, Scikit-Learn, TensorFlow, LangChain, RAG, OpenAI / Ollama / Groq APIs, FAISS, ChromaDB
- **Frontend:** React JS, JavaScript, HTML5, CSS3
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Tools:** Git, GitHub, Maven, Gradle, Docker Compose, CI/CD, Postman, IntelliJ IDEA
- **Familiar with:** AWS (EC2, RDS, S3), Vercel

## PROFESSIONAL EXPERIENCE

**Junior Software Developer | TPIPAY Financial Technology Pvt Ltd (Fintech Startup), Bengaluru | Mar 2026 – Sep 2026**

- Developed and maintained 80 Spring Boot REST APIs that power payment workflows and core backend functionality.
- Integrated 3 payment gateways (**PayU, PhonePe and Cashfree**) into backend payment flows, covering payment creation, status checks, refunds, UPI QR, autopay, bank payments and card payments.
- Processed provider **webhook callbacks** to update payment status in PostgreSQL.
- Improved response time using **Redis** for 3 use cases: payment session caching, PhonePe OAuth token caching and email OTP storage.
- Secured APIs with 2 authentication layers (**JWT** and merchant API-key validation) plus role-based access control using Spring Security.
- Delivered backend features using **Spring Data JPA and PostgreSQL**, and containerized services with **Docker and Docker Compose**.
- Built merchant **KYC** onboarding with document upload for 7 document types using S3-compatible storage.
- Bootstrapped the entire **React JS** frontend project and integrated it with the backend REST APIs for end-to-end web application features.
- Tested 50 APIs with Postman, used Git and **Gradle**, and resolved 55+ production bugs in backend services.

**Machine Learning Intern | Strydo Technologies Pvt Ltd, Vellore, TN | Nov 2024 – Apr 2025**

- Trained and evaluated machine learning models in **Python** (Pandas, Scikit-Learn and TensorFlow), including data preprocessing, feature engineering and parameter tuning.

## PROJECTS

**Team Collaboration and Task Management Platform** | Java, Spring Boot, Spring Security, JWT, MySQL, React

- Engineered a full-stack, Jira-style platform with a Kanban board, task comments and 3 user roles (Admin, Manager and Developer).
- Designed 27 REST endpoints using a layered architecture (controller, service, repository), DTOs, Bean Validation, centralized exception handling and pagination.
- Secured the platform with **JWT authentication**, **BCrypt** password hashing and role-based access control across 3 user roles, plus protected frontend routes.
- Modeled a normalized **MySQL** schema of 9 tables with foreign keys and indexes; added a live dashboard, activity history log and in-app notifications.

**JAAS Prime Health Care Application** | Java, Spring Boot, React JS, Spring Data JPA, MySQL

- Built a full-stack healthcare app with patient registration, appointment scheduling and medical records: Spring Boot REST APIs, Spring Data JPA, MySQL and a React JS frontend.

**Bank Management Application** | Java, Maven, MySQL

- Built a banking application supporting account management, deposits, withdrawals and balance inquiries, using a normalized MySQL schema.

**AI Career Assistant** | Python, Streamlit, LangChain, FAISS, Ollama, OpenAI API

- Built a resume analyzer that scores resumes and suggests improvements, and a RAG-based PDF chatbot that answers questions from uploaded documents.

**California Regulations Compliance Platform** | Python, RAG, ChromaDB, FastEmbed, Groq API

- Built a regulatory advisor that crawls, parses and indexes regulation content with resumable checkpoints and answers compliance questions using semantic retrieval.

**Repository Intelligence Agent (Backend)** | Python, FastAPI, Docker

- Developed a FastAPI backend service run with Uvicorn and containerized with Docker.

## EDUCATION

- Master of Computer Applications (MCA), Sacred Heart College (Autonomous), Tirupattur, TN, 2025, CGPA: 6.89.
- Post Graduate Diploma in Data Science (PGDDS), Sacred Heart College (Autonomous), Tirupattur, TN, 2025, CGPA: 7.42.
- Bachelor of Computer Applications (BCA), Auxilium College (Autonomous), Vellore, TN, 2023, CGPA: 7.0.

## CERTIFICATIONS

- **Java Full Stack Development Certification**, ExcelR Solutions, Bangalore (Jun 2025 – Nov 2025), covering Java, Spring Boot, REST APIs and React JS.
